

E-BIKE – GO GREEN

The Avon Group has come up with yet another attractive and appealing innovation to suit the common man's need without being hurtful to Mother Nature. The company is engaged in the development of a range of e-bikes. These use no gas, emit no exhaust, and make no noise to the surprise of many a passer-by. Time for the noisy and air polluting scooters and motorcycles to retire!

CLASSIC FEATURES: Popular model AVON E-Scoot is a truly novel concept that has generated tremendous interest in an enthusiastic spread of consumers. Aerodynamic shape, eco-friendly running, easy battery-charging, strong shock absorbers, no exhaust and no pollution are features that combine to promise a comfortable and hassle-free drive.

A mature and advanced technology provides relief from the sky-rocketing fuel prices and peaking environment concerns, offering a perfect and highly economic alternative to the country's automobile boom. Within months, sales have moved up from a meagre 150 to more than 500 a month.

DIVERSE DESIGNS: Six models are already on stand and another one is expected to join later this year – all are exempt from CMVR Regulation. The next phase of development will bring in higher speed and upgraded motor capacity in the non-exempt category.

MARKET PLAN: Nationwide more than 80 exclusive outlets in important cities are already functioning and more are planned as sales progress.

ENTICING PROGRAM: To promote the category various state governments have come forward with attractive schemes of cash subsidy and exemption from VAT. The Government of Delhi has in place a comprehensive package promoting the green option. As more state governments join in, the cost of ownership of battery-operated vehicles will come down making these a lot more attractive.

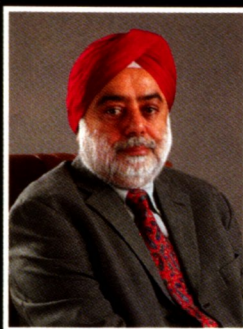

E-SCOOT

right job on agreeable terms. The Group keeps conducting on-the-job training, orientation and HRD training programmes on a regular basis.

CUSTOMER FOCUS

The product realisation division comprises all the tasks required to develop solutions to meet customers' needs. The processes and machinery employed are consistent with the Quality Management System in place. The Group's business

A WORD FROM THE CHAIRMAN

Mr. Onkar Singh Pahwa
Chairman & Managing Director

Years of trust building has earned AVON the status of a household name. AVON, APSARA and BUKE have become synonymous with dependable quality at competitive price.

Vision: The 57 years that we have been in business we have invested heavily in our human capital. Our work force carries a sense of belonging. Their happiness is the key to our growth. Some of them joined the company in their youth and now, their second generation is growing with us to be old enough to bequeath their trust to the generation next. We have grown and prospered with them.

Motto: To deliver quality at affordable price.

Product Range : • Bicycles: roadsters, mountain, city, BMX, kids', sports and performance • Exercisers, junior and senior • Bicycle parts: wide range • Electric bicycles

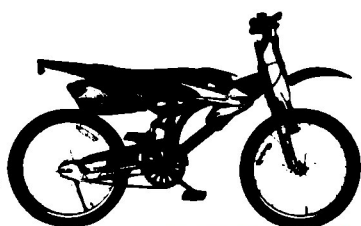

Quality Management System: ISO 9001:2000 (E) by TUV Cert

strategy is completely customer-driven. Periodical customer feedback on quality, level of satisfaction and servicing of complaints is relied upon as a regular input for improvement. Customer satisfaction has been the prime objective of the group. Aap ne sujhaayi, hum ne banaayi meaning 'we made it exactly as per your suggestion' has been its advertising refrain. Completely relying on customer feedback, the company values and acknowledges such inputs.

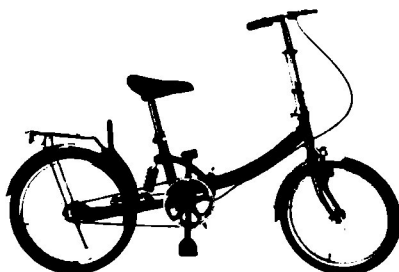

LENDING A HELPING HAND

The Avon Group has been involved in many charitable works ever since its inception. With a view to ensure better health facilities for the poor and the downtrodden, the company started the Sardar Nihal Singh Pahwa Hospital in the city's Industrial Area way back in 1973. For 25 years, the late Sohan Lal Pahwa nurtured it with the fondness of a parent. Later, focusing his attention on the rural area he set up the Mata Kaushalya Devi Pahwa Charitable Hospital in Hambran near Ludhiana. To this day, it is the only modern hospital serving the neighbourhood of 40 odd villages.

The Avon Group gainfully draws upon emerging technologies, stays engaged in its endeavour to add value, keeps a close watch on its costs and ensures fair business dealings. With these ethical values and efficient strategies the Group has succeeded in being a top performer in the bicycle industry for so many years.
