

EARN A DEGREE WITH JOB

It is not just the story of a busy practicing professional running his enterprise efficiently. As an able Chartered accountant, he was expected to do it well. And bring it success. But he looked beyond. As he was setting up his Company in early 1989, after qualifying as a CA, a gnawing ache within himself made him restless.

He had a vision to push the horizons. Build a knowledge hub that offered not just theoretical training, but a hands-on exposure to the truly deserved. Harness talents so that they became worthy resources in corporate environ. The vision and tireless efforts of one man that shaped The Institute of Computer Accountants (ICA)- Narendra Kumar Shyamsukha.

There were qualified students. Talented resources who had studied hard and performed well in academics but had little knowledge of the Corporate demands. They had to be made job ready. The skills had to be honed to make them truly employable. And yet, there weren't too many professional Institutes that were geared to lead the way.

For ICA, this triggered the spark. ICA made a modest beginning in 1999, in Kolkata. First the students came in trickles. But they were quick to realize the change it was making to their lives. Their way of looking at things. They appreciated the coaching style that was down-to-earth & job oriented..

There were growing employment opportunities. And the graduates from ICA coped better. The efforts were paying off. ICA was becoming the preferred Institute. ICA today is now right in the forefront. The courses designed scientifically have helped over 1.50 lakh students find jobs and make a livelihood. Over 100 Faculty members including CA's devote their time to harness talent and sharpen skills.

Over 300 Branch offices across India cater to the training needs. 30 Placement Offices and over 50,000 registered employers offer placement help. With time, ICA has only grown and enhanced its scope. ICA is not just another Institute that has become successful. Narendra Kumar
