The versatile new Honda Jazz fits in all that you can imagine and more. So why not lift the magic seats into tall mode and toss in a bean bag. Why not dive them down into long mode and roll out a sleeping bag. Why not drop the backrests into utility mode and shove in a mountain bike. Why not make the most of the spacious interiors and carry your world around. Why not place surprises for each other in the thoughtful nooks and compartments all over. Why not fill up the ultra large boot with loads of luggage and take off. Why so serious when you can do MaGiC with your Jazz?
