it into a global power. Yet, as the Committee on Renovation and Rejuvenation of Higher Education headed by Professor Yash Pal, put it: "Most instrumentalities of our education harm the potentiality of human mind for constructing and creating new knowledge. We have emphasised

delivery of information and rewarded capability of storing information. This does not help in creating a knowledge society."

Start Reform 10

In 1991, faced with a severe economic crisis, Manmohan Singh, then the finance minister, introduced liberalisa-

tion that brought impressive growth rates. Today, the education sector faces a somewhat similar crisis and has much the same woes: a venal licence permit raj system that has killed initiative and growth. Dr Narendra Jadhav, member, Planning Commission, who was till recently the vice-

chancellor of Pune University, was astounded that its syllabus had not been revised for more than 30 years and teachers were caught in a time warp. "Outdated syllabi and out-of-sync teachers can be a real killer for higher education." While Jadhav set about rectifying the univer-

THE QUALITY OF INDIA'S HIGHER EDUCATION SYSTEM WILL
determine the pace of the country's emergence as a global power.
