

The Haryana Chief Minister, Mr. Bhupinder Singh Hooda has had a clear vision backed by an immense practical sense to turn the state into an industrial giant and usher in an era of equity and social development. During the last four years, Haryana has emerged as the first choice of investors worldwide. It has a first rate infrastructure for industrial and educational growth backed by precise policies. The results are there for all to see and admire.

PRO-INDUSTRY POLICY MAKES HARYANA CYNOSURE OF INVESTING EYES

The industry-friendly policies pursued by the Bhupinder Singh Hooda Government, have made Haryana the cynosure of all investing eyes, both domestic and global. Small wonder that the state has succeeded in attracting sizeable investment from multinational companies, large business houses, foreign investors, non-resident Indians, small-scale entrepreneurs. In fact, Haryana has carved a niche for itself as an industry-friendly state that offers a rich reservoir of skilled, motivated and relatively low-cost

manpower with good infrastructure and harmonious industrial relations. Occupying just 1.37 per cent of the country's geographical area and housing 1.97 per cent of the country's population, Haryana has the highest per capita income among big states and the second highest in the country after Goa. The investment-friendly environment, generated by the Congress Government, has brought in investment worth more than Rs 40,000 crore in the industrial sector in Haryana since the announcement of the

Industrial Policy on June 6, 2005, and industrial projects worth Rs.90,000 crore are under implementation. The objective of the industrial policy was two-fold: to generate employment and create investment and facilitate dispersal of economic activities, particularly in the backward areas of the state.

With a view to implementing the policy, a multi-pronged strategy was adopted to achieve the objective of attracting investment worth Rs 2 lakh crore and generating employment for two million persons in the next ten years. This was sought to be achieved by simplifying the rules and regulations, creating an effective institutional mechanism, developing strong infrastructure and giving incentives and concessions to industry, particularly in the backward areas.

STATE ATTRACTS RS 9,000-CRORE FOREIGN DIRECT INVESTMENT

Haryana has received foreign direct investment (FDI) worth Rs.9,000 crore in the last four years and the highest number of SEZ proposals in the country. So much so, the largest SEZ in the country is being set up by the Reliance Industries Ltd. in collaboration with the Haryana

State Industrial Development Corporation (HSIIDC) in Gurgaon and Jhajjar. Haryana ranks number one in the country in implementation of industrial entrepreneur memoranda/letters of intent for setting up large and medium industries..

Significantly, Haryana produces more than 50 per cent of the passenger cars and 50 per cent of motor-cycles manufactured in the country and accounts for about 25 per cent of India's total production of sanitary wares. One out of every four bicycles in the country is manufactured in Haryana. The number of large and medium units in the state has increased from 162 in 1966 to 1,347 by the end of December, 2008. In addition, there are about 80,000 small-scale units in the State. What's more, about 1,000 projects in the state have foreign technical/financial collaboration.
