MERIDIAN 0157

The loaded new Honda Jazz is here to set the standards in safety. But why should safe be staid? Why not let ABS set you free to step on it. Why not be carefree knowing that you're cared for by airbags. Why not let G-CON protect you while you live footloose and fancy free. Why worry when you can be happy? Why be so serious when there's just one life to zip through the fast lane?
