

**Sh. YOGENDRA PRASAD**

Date of Birth 6th April 1945
 Ed. Qualification B.Sc. Engg. (Elec.), FIE Professional
 Affiliation Hydro-Electric Power Development
 Career Span 1968-2009
 Present Status Spl. Advisor (Energy), Govt. of Uttarakhand & Chairman, UJVNL

**INTERVIEW WITH
 Sh. YOGENDRA PRASAD
 SPECIAL ADVISOR (ENERGY) TO
 GOVT. OF UTTARAKHAND
 & CHAIRMAN, UJVNL**

1. What are the missions of the Nigam for growth of Urja Sector in Uttarakhand?

- To be an excellent & efficient organization on strength of its Human Resources.
- To be able to meet the entire electricity requirement of Uttarakhand for decades to come.
- To undertake related infrastructure development which will provide opportunities for growth of economy of the state.
- To have the best corporate governance in Uttarakhand.
- Contribution to improvement in the quality of life of the people of Uttarakhand.

2. What are Company's Growth Plan?

The company is making steady progress on its chartered growth course. Besides developing the business of the Nigam it is also helping GoU in formulating policy for growth of Urja Sector in Uttarakhand and harnessing energy potential available in the state. The company presently having installed capacity of 1305.90 MW which will be enhanced to approx. 1996.00 MW by the end of 11th plan.

3. What are Key Technology Trends and Development for the Power Generation in Uttarakhand?

- Involve Proven Developers for large Projects.
- Offer Projects PFR to Private Sector for time-bound & committed development by the bidder.
- Facilitate development of six to eight projects simultaneously at any given stage by various developers.
- Benefit (Cost & Time reduction) from competitive bench marking amongst developers working simultaneously.
- Enhance the acknowledged human resource of Uttarakhand in the field of Hydro Power.

4. What are focused areas of UJVNL?

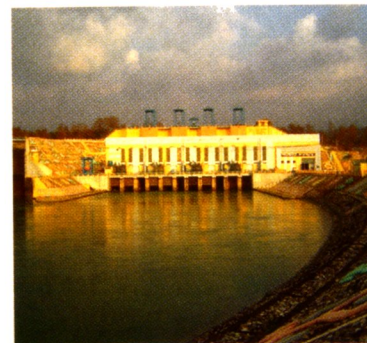

- UJVNL is now focusing on construction of 480 MW Pala-Maneri project scheduled to be commissioned by 31.12.2012.
- Vyasi 120 MW project to be commissioned by 31.12.2011.
- Small Hydro Electric Projects of 90 MW are also scheduled to be commissioned by 30.09.2011.
- Sustained Renovation & Modernization of old running projects.

5. What are future plan of UJVNL for making Uttarakhand an Energy Surplus state?

- Uttarakhand Government would decide soon on allocation of major new & incomplete projects.
- Close review of the progress on IPP projects for time bound implementation to avoid loss of generation potential.
- Uttarakhand Government would soon advertise to invite competent developers in view of Gol Hydro Policy.
- Initial facilitation/support to developers in getting the project off-the ground.
- Provide institutional support to experienced and financially competent developers.

POWERING UTTARAKHAND'S PROGRESS...

Uttarakhand has a very high potential about 20,000 MW which is yet to be developed and to give impetus to Hydro Power. Uttarakhand Jal Vidyut Nigam Limited (UJVNL) is a wholly owned Enterprise of Government of Uttarakhand formed in the year 2001 for Hydro Power Generation, Development of new Hydropower Projects and Renovation, Modernization & Upgradation of existing Hydro Power Plants within the State. UJVNL operates hydropower plants ranging in capacity from 0.2 MW to 304 MW, of a total capacity about 1306 MW.

In a short period of Eight years since the formation of state, UJVNL has carved out a place in the Power Sector as a progressive and efficient operator. The objective of its formation was to make Uttarakhand as an URJA state and to explore the untapped Hydro potential so that the state becomes surplus in Electricity generation. UJVNL has started its operations as a commercially focused corporate entity, with a mandate for promoting the development of hydro power in the state of Uttarakhand. UJVNL has aggressively pursued its mandate, first restoring some of its ageing generating stations and thereafter, embarking upon a massive renovation, modernisation and up gradation program to extend their lives while simultaneously improving efficiencies further. UJVNL is now pursuing rapid expansion of its capacity. In less than ten years time it intends to become approximately three and a half times its current size in terms of installed capacity.

UJVNL has commissioned Maneri Bhali-II (304 MW) in March 2008 having annual generation of 1566 MU. UJVNL also in process to take off construction of Pala Maneri Hydro electric Project (480 MW) & Vyasi HEP (120 MW), which works as catalyst for making Uttarakhand as "Urja Pradesh". Moreover, UJVNL enhancing and sharpening its capacity to execute the projects rapidly and simultaneously so as to add the hydropower generation capacity at the earliest possible

UJVNL inherited 9 Large & Medium Hydro Power Plants with an aggregate capacity of 948.15 MW and 40 Small Hydro Power Projects (SHPs) of capacity ranging from 0.2 MW to 25 MW from erstwhile Uttar Pradesh State Electricity Board. The generation and the availability of the power plants have improved substantially over the period.

CONTRIBUTING TO DEVELOPMENT OF HYDRO POWER IN UTTARAKHAND BY UJVNL

Developing New Projects / Sites (Capacities under reassessment)		Constructing Commissioning of New Projects	Comprehensive Modernization of Old Power Plants	
<200 MW	>200 MW			
Taluka Sankri (140 MW)	Bhairoghathi (381 MW) Tamak Lata (280 MW)	Maneri Bhali II (304 MW) (Commissioned)	Mohammadpur (9.3 MW) Galogi (3 MW)	Chibro (240 MW) Chilla (144 MW)
Nand Prayag Langrasu (100 MW)	Sela Urthing (230MW)	Pala Maneri (480 MW)	Pathri (20.40 MW) Dhakrani (33.75 MW)	Khodri (120 MW) Kulhal (30 MW)
Bhiliangna-II (63 MW)	Bowla Nandprayag (300 MW) Sarkari Bhyol Rupelbagar (210 MW)	Lakshwar Vyasi (420 MW)	Ranganga (198 MW) Dhalipur (51 MW)	Khatima (41.4 MW) Tloth (90 MW)

SPREADING SHP'S FOR NUCLEARING GROWTH IN INTERIORS OF UTTARAKHAND

At present 21 Nos Small Hydro Projects of total 21.05 MW capacity is under operation with UJVNL. Construction work is also going on progress on 10 Nos SHPs of total 51.50 MW capacity. Construction of 04 Nos SHPs are under financial assistance of ADB. Rehabilitation work is also going on progress on stopped SHPs which are handed over to the Nigam.

Enhancing & Building Hydro Power Human Resources up to International Standards

*Capacity Building *Benchmarking for Performance & Productivity *Global Exposure & Training of Engineers *Organizational restructuring to focus on technical working
