

Group of Commitment

ality is a Never Ending Journey

GLAIPR • GLAIPS • GLNAIT

The centralized Training and Placement Department of the Group works incessantly towards the paramount goal of the students' employment in various industries or to help them begin a business venture in which they can achieve phenomenal success. The Department operates with a twin-fold focus, i.e. augmenting the internal competencies by enabling contemporary grooming of students and by assisting industries to identify and absorb intellectuals with requisite technical and managerial skills. Today GLA is going great guns and is reckoned among the top institutes in terms of placements. In the year 2009, more than 90 companies (including MNCs) visited the Group for campus recruitment and recruited more than 450 students. In the beginning of the session 2009-10 itself, already 85 students have been placed and by the end of the year 2009 it is expected that the number of students placed may touch the 500 mark. All the top notch domestic and multinational companies have been patronizing the Group and are continuously recruiting our students like never before.

GLA campus has got several special features. All of these are modern and advanced, yet, they are provided with personalized attention. That is why even though the facilities at the campus are urban and modern; the atmosphere is homely and warm. International technical and management conferences witness the gathering of the stalwarts from industry and academics alike. A centrally air conditioned library spread over 1400 sq. meters, is a visual treat for the voracious readers. It contains a rich and adorable collection of valuable books of national and international origin.

GLA campus is endowed with cultural convergence and synergetic learning atmosphere. More than 80% strength of the students on roll have a perfect, and hassle-free stay in the campus with captive power generation and round-the-clock water supply.

Narayan Das Agrawal, Chairman, GLA Group, Mathura

Mr. Chairman you are known for your philanthropic & charitable initiatives and your role in transforming the educational services landscape in the belt of Western Uttar Pradesh. The education sector is going through turbulent times. Your perception about the new initiatives in the education sector and its impact on the changing paradigm of modern education system?

Today the era is of knowledge-driven economy and learning societies. Education, in the current scenario, is playing an increasingly vital role in promoting economic solidarity, social cohesion, individual growth, sustainable development, and a culture of peace and world citizenship. Since our views about the way we live, learn, work, and 'think about work' have changed, the acquisition of knowledge and skills provided by a traditional formal educational setup do not correspond to the changes. Therefore, an education system with robust fundamentals is the dire necessity for the institutions in the changed paradigm.

The demands of stakeholders are becoming stringent and they are becoming increasingly aware of the mind-set of education service providers. In light of these changes, what is new in the bundle of offerings?

Change is a universal phenomenon and the thumb rule for success is that of proactively identifying the drivers of change. With the growth and maturity of the Indian education sector, the stakeholders have become more demanding. What we need today are responsive and responsible partners as service providers and users-interface. We now need an integrated and coordinated mechanism which can adapt to the changes. Keeping the current level of maturity in consideration, I personally feel the University status is much needed. With the experience, capabilities and infrastructure that we possess, we hope to get a full University Status from the ensuing session.

How do you strike a balance between the extent of integration and differentiations among diverse portfolio of courses?

This is the facet where our core competence comes into play. Today what we need is a generation which is skilled in multiple dimensions because of the vivid industry requirements. On one hand, you must foster integrated approach and, on the other, must strike a balance for the customized requirements. A balanced mix of autonomy and a judicious blend of centralized control can be achieved only if belief in the vision has commitment of one and all.
