

One of its kind -State-of-the-art auditorium

Jaypee Institute of Information Technology University (JIIT), Noida is a Deemed University with an outstanding reputation and recently rated 7th amongst the private Universities by the Times of India Survey. It is sponsored by Jaiprakash Sewa Sansthan (a not for profit trust), and fully backed by the Jaypee Group of Companies.

The University attracts the brightest and the best students regardless of their Social, Educational, Regional or Ethnic background. Students imbibe top rate education and enjoy a campus culture of unparalleled depth and diversity. The University ensures that students with the potential flourish and develop into top technocrats and contribute to the Nation development.

At the University special emphasis has been placed on developing a student on a solid foundation of knowledge, confidence building, pursuit of excellence, improving self-discipline and enhancement of creativity through motivation and

drive into an engineer well trained for the rigors of professional and social life.

The University encourages all students to make the life outside the classroom vibrant and enjoyable by engaging themselves in multiple extracurricular areas, no matter how talented or experienced they are in any of those areas. This is enhanced by best of facilities and equipment designed to make life outside the classroom an exciting and memorable experience.

JIIT's state-of-the-art environmentally conditioned campus comprises smart buildings with wi-fi connectivity covering the Academic Block, Business School cum Research Block, Faculty Residences, Student Hostels and Annapurna. Well equipped modern laboratories and an intellectually stocked Learning Resource Centre with over 30,000 books and 14,500 e-journals and resources provide a pleasant and stimulating ambience for students, in an eco-friendly environment.

SOMETIMES IN THE WINDS OF CHANGE WE FIND OUR TRUE DIRECTION

KUNWAR SHEKHAR VIJENDER
PRO CHANCELLOR

The purpose of education is to improve the quality of life. Education enhances knowledge and life management system skills which in turn improve quality of life in the society. It is necessary to understand the interrelation amongst various disciplines and apply the gained knowledge successfully for the benefit of the society.

Setting up of higher education Institutions shall go a long way in strengthening the vast knowledge resources that India possesses. The world and its economy is knowledge-driven. When I visited the States on Obamas' oath ceremony I was 'inspired' by his campaign - WE CAN CHANGE. I had the privilege to invite the President to visit Shobhit University in near future. I also got the opportunity to present him with Swami Vivekanandas' book 'My Thoughts on Education'.

Yes, we can CHANGE- and we have to change. This is the time of profound change for higher and technical education, across the world, as we adjust to the demands of a knowledge-based economy and a global market place, demands for good governance and accountability, competition among institutions at all levels, and an unrelenting demand for quality. We at Shobhit University goes beyond the established standards and aims to create a conducive academic climate to facilitate integration of the younger generation into the logic of the present system.

I take this opportunity to mention a couple of initiatives we are taking at the Shobhit University:

- Shobhit University Business Incubator: SUBI is envisaged to foster the idea of innovation, enterprise and entrepreneurship in the field of Business Management, Engineering, Computer Sciences, IT Technology and Pharmaceutical Sciences. It is aimed to serve as a launching pad for enthusiastic entrepreneurs.
- International Skills Development Centre ISDC: India is considered as the grand destination for skill development considering its resurgent youth potential in the next century. And need for skills development is all the more important in these times of economic downturn. The ISDC is a modest initiative for developing this tremendous potential as we usher ourselves into the new century and in working with national and international bodies including IGNOU and CWYP.
- India International Exchange(IIE) – this initiatives aims at promoting national research on issues of contemporary significance and promote foreign investments. As a Facilitation centre, the IIE seeks to provide necessary data to university researchers/scholars abroad and also act as a platform to carry out surveys for industries abroad so that they may make investments in specific areas in India.
- Besides this there are initiatives like International Academic Alliances that promotes academic and student exchanges.

Recently Knowledge Commission has recommended opening of about 1500 Universities to strengthen higher education system and to improve the gross enrolment rate which is quite low presently. To support such cause and to make India a developed country, about 10 Lac school teachers and 5 Lac professional teachers are required. Hence, there is need of utilization of new technologies to address this issue. The available technology shall be used to infuse synergy in the system.

-based on discussion with Kunwar Shekhar Vijender, Pro Chancellor of Shobhit University Meerut
