

JPIET: Shaping and sharpening the talent of bright youngsters into engineers

HARI OM AGARWAL
PRESIDENT

Under the aegis of the JP Educational trust society, JP Institute of Engineering and Technology, Meerut established in the year 2007 is affiliated to Uttar Pradesh Technical University (UPTU) and is approved by AICTE.

The institute meets the requirement of ISO 9001-2000 and has been able to make a niche for itself in a short span of two years. JPIET is a symbol of incredible technical education for shaping and sharpening the talent of bright young engineers, thus producing technocrats who will make a place in the industries as well as other arenas. Headed by eminent IITian, the institute has grown leaps and bounds and today and has emerged as one of the most preferred choice for aspiring engineering students seeking admission in the courses that institute offers in the field of Computer Science, IT, Electronics and Mechanical

Engineering. The institute has distinguished faculty, able and experienced in their individual field imparting quality education to its students.

The institute came into being for the purpose of meeting the ever-growing demand of techno-engineers for industries in India and abroad. The ever expanding global market and open gates of world economy have opened up new vistas of job-opportunities for well trained engineers in Computer Science, IT, Electronics and Mechanical Engineering

The institute provides excellent infra structural facilities with well equipped laboratories, modern computer center, spacious and furnished class rooms, seminar halls, workshops with an intention to provide quality technical education with global standards. The institute has a central library, which has a good collection of books (both text and reference) CD's, back volume of journals etc. to meet the academic and information need of its users. There are separate hostels for boys and girls, fitted with modern amenities; rooms are airy, spacious and well furnished. There is a separate dining hall where meals are served in time by a dedicated and professional workforce trained at our in-house JP institute of Hotel Management.

The institute reserves certain management seats for which a test is conducted basis, which the students are selected on merit.

The Management of the institution is very fore sighted, realizing the need of the hour the institute is powered by PACE-UP, i.e. Personality Assessment Center for Excellence" where professionals in the field help our students groom through evaluating themselves on their strengths and weaknesses and their qualities and finding solutions to overcome their lacunas.

ROLE OF CORPORATE HOUSES' IN HIGHER EDUCATION

The Corporate landscape is undergoing continuous change as a result of globalization, impact of information technology and search for new methods of doing business. To stay in business and grow, the organizations need to constantly evolve, innovate, and change systems for scanning environment effectively, come up with action plan and have people to make it work. The people need to be equipped with new knowledge, new skills, attitudes, mind sets and values. Tomorrow's leaders need to be sensitive to social concerns and have tolerance for non conformity, learning focused, have ability to take risk and manage diversity and capacity to deliver in diverse environments.

As educators, it is our job to prepare students for the future by equipping them with critical skills for the 21st century that will allow them to meet the unknown head on and excel. For this students must understand far more than business concepts – they must be taught how to learn "Learning the Art of Learning", how to develop adaptable strategy, how to think creatively and how to apply their skills to any situation that may arise in the new business landscape as the interacting forces of technology & globalization affect the work place, the market place, new products & new services. We need to give them the thinking & processing tools that will allow them to adapt so that even when the world turns out to be different than what everybody thought, they will still be in the game.

Although, there are differences in business practices across the globe, there is one thing in common to which all students need to be sensitive. Ethical & social responsible conduct is central to all corporations. This message of Corporate Social Responsibility (CSR) needs to be emphasized way strongly in B-School curriculum.

DR. REENA RAMACHANDRAN
DIRECTOR GENERAL
