WE NOURISH AND NURTURE TALENTS

Emphasis is laid on the blending of modernity with tradition & we proudly claim that "We nourish & nurture talents". We encourage healthy competition to enable our students to find a place in today's competitive world. Hence sharing of knowledge in different fields of study is our strength and not confining the students to academics only.

Under the aegis of AIASSAER, MITRC is an institution that undertook the task of spreading the light of knowledge & values at Alwar, a city of parks, and widely known as "The Singhdwar of Rajasthan" located on the one hand amidst the beautiful landscape of Aravalli hills and Sariska Tiger Sanctuary (National Park) and breezing fresh air and soothing the minds & souls of the inhabitants, on the other hand. Alwar falls in National Capital Region (NCR) and participates in writing the history of India's economic growth. MITRC aims at motivating & directing the Engineering minds of the young students to become the trendsetters in developing, shaping and preserving the society and the world at large.

MITRC emphasizes on all round development of its students. It not only aims at equipping the students with the latest Engineering skills & knowledge to successfully meet the challenges posed by globalization, but also to be good & worthy citizens of this great country aiding it in its overall progress & development.

ADMISSION OPEN FOR 2009-10 FOR FOLLOWING COURSES

B. Tech.

Computer Science Engineering
Information Technology Engineering
Electronics & Communications Engineering
Mechanical Engineering

M.B.A.

Human Resource
Finance
Marketing
Information Technology

HIGHLIGHTS OF MITRC

- Architecturally beautifully designed building (model from Canada) and fascinating landscape.
- Wi-fi campus, 24 hours internet facility with dedicated 1 mbps internet bandwidth
- Student faculty ratio of 15:1
- Computerized Language Lab for Spoken English
- Well equipped and fully furnished labs for Research and Development
- Separate hostel facility for Boys and Girls
- Scientifically designed orientation programs for focusing on overall development of students
- More than 20,000 books in library with Journals
- Conveyance is available to facilitate movement of students and faculty member from every corner of city
- A complete software package for students to access their performance on internet
- Special workshops & seminars from companies like HCL, TULIP, INTEL, DELL, MARS etc.
