SCIENCE STUDENTS MAKE ST. STEPHEN'S COLLEGE PROUD

biology, bio-technology, and food science and food processing. Raising the bar every year by reinventing its teaching programme, Loyola is already looking at the future. "We hope to have smart classrooms as well as e-learning in the years to come. Our infrastructure needs to be revisited too," says Rev. Dr A. Albert Muthumalai, principal of Loyola who insists that "science can achieve its true potential only when it is used to serve society".

Meanwhile, at St. Stephen's, which came in second this year, the college's philosophy in nurturing achievers has helped produce students who excel in fields across the spectrum. A large number of students are selected for prestigious scholarships abroad every year. One of the new initiatives at St. Stephen's is to offer quality education to people from an underprivileged background. "This year, we offered a record number of stipends to needy students," says Nandita Narain, dean, St. Stephen's College. Similarly, at the third ranking St. Xavier's Kolkata, which was recently granted autonomous status, internships for students in various new disciplines were introduced at the undergraduate level. "A minimum of three weeks of internship in various industries has been initiated to help the students understand the subject better," says college principal Father Felix Raj. This year, the college received 4,500 applications seeking seats in the science stream. Especially, popular courses like physics, chemistry, statistics, computer science biochemistry, microbiology and biotechnology. Well-equipped labs provide the required practical back-up which helps in making a world of difference.
