BITS-PILANI RESERVES SEATS ONLY FOR TOPPERS OF BOARD EXAMINATIONS

inations. The institute has a unique system of allowing students to decide their teachers and even timings of classes. "Transparency in selection, flexibility in teaching and industrial training in every degree course is what makes BITS rank so high," says L.K. Maheshwari, vice-chancellor of BITS. The industrial partnership component, which has students even going abroad for training, has BITS teachers stationed at the place of training. BITS has 150 companies joining hands for this training. Besides a strong faculty, companies like Motorola and IBM have set up their laboratories here. BITS' strong ties with industry at various levels is what has earned it Best Corporate-University Alliance award, too. It now has campuses in Dubai, Goa and Hyderabad also. "These are campuses of the same institute and not different institutes," Maheshwari clarifies. G. Raghurama, deputy director, academic, points out how stress on entrepreneurship and leadership-building skills is imbibed at every stage to allow a strong decision-making personality to come up. In this remote part of India, BITS shines as an oasis, which incidentally is the name of its cultural festival too.
