

Experience the advantage of a unique Twin Cooling System with Samsung Side By Side Refrigerators.

Bring home the ultra stylish Samsung freshtech Ultima. Its innovative Twin Cooling System cools both the freezer and the refrigerator section separately so that odours don't mix. Now, tonight's dessert won't smell of yesterday's fish.

Cheil-0395/09

Twin Cooling System™

Separate air-tight compartments
for refrigeration and freezing.
So odours don't mix.

Conventional Cooling System

Air flows between the refrigerator and
freezer compartments, spreading
strong odours throughout the fridge.
