

BACARDI. AS CAN BE SEEN, IT HAS QUITE A COLOURFUL HISTORY.

Imagine it was 1862, and you were in Cuba. It was an idyllic time; warm sun, endless expanses of white sand and dreamy blue sea. The inviting beat of Cuban drums and music, and obviously, therefore, a lot of dancing late into the wee hours.

The only fly in the ointment, so to speak, was the local brew. Rum, the usual staple, was dark and harsh. A few sips, in between grimaces, were more than what

the average reveler could manage. A few grimaced, and got on with the job. Not so Don Facundo Bacardi.

On his quest for a lighter, smoother drink, he spent endless hours in the brewery making magic. And magic is what he created.

However, all magic must have a name, and this too needed one. Donna Bacardi, the ever supportive wife suggested a simple and profound one - Bacardi.

Party connoisseurs were quick to discover Bacardi's greatest virtue: It was a wonderful mixer. Indeed, you could add Bacardi to anything, and still end up with an interesting, flavourful combination.

And today, the test still stands. And if you've never been introduced to the wonders of Bacardi before, we suggest a simple remedy. Open one today.

Bacardi is the base for many of the world's most famous - and colourful concoctions. The Mojito. The Daiquiri. The Cuba Libre or simply create your own.
