

ORGANIC AGRO-PRODUCTS OF NAGALAND

SHRI. NEIPHIU RIO
Hon'ble Chief Minister

The State of Nagaland measuring 16,579 sq.kms, is almost entirely hilly and mountainous with altitudes ranging from 194 meters to 3840 meters above sea level, ascending from the humid foothill plains of Brahmaputra valley to the snow clad frigid peak of Saramati at the Myanmar border. The temperature variation on a given day and time depends on the locations, with the annual mean temperatures between 4°C to 30°C. The rainfall is throughout the year and measures upto 500mm. These factors endow the State with varied climate zones by elevation, and makes it congenial to corresponding species of crops to thrive. The fertility of the land and the soil types do not entail usage of chemical fertilizers, which ensures all crops are organic products.

The Government has accorded top priority to integrated activities of agriculture and allied departments. The spectacular increase in agricultural production, achieved during the first ministry of DAN (2003-07), continues to show rapid growth and is expected to touch 5.40 lakh tons during the current year. Horticulture plays an important role in the socio-economic development of the people by providing self-employment and income generation. Floriculture has attained the status of an industry, blossoming with production of flowers touching 13 lakh stems in a year, and are already exported to cities of India and to foreign markets.

To boost crop production, high yielding and short duration crop varieties were procured from Certified Seed Agencies and distributed to the farmers free of cost.

Seed Distribution:

Sl.No.	Scheme	Qty (in qtl)	Area covered (in ha)
1	Oilseeds	1440	3330
2	Paddy	2100	3500
3	Ginger	350	30
4	Pulses	1120	1500
5	Maize	300	1500
6	Potato	120	10

Production for 2008-09:

Sl.No.	Particulars	Anticipated Achievement 2008-09
1.	Food grains	5,10,045 M.T
2.	Oilseeds	75,860 M.T
3.	Commercial crops	4,24,510 M.T

CROPS

1. Fruits		
	Citrus	755 ha
	Passion fruit	550 ha
	Banana	700 ha
	Pineapple	950 ha
	Cashew nut	290 ha
2. Spices:		
	Turmeric	348 ha
	Large Cardamom	291 ha
	Ginger	393 ha
	Naga Chilly	248 ha
	Black Pepper	348 ha
3. Medicinal & Aromatic Plants:		
	Aloe Vera	500 ha
	Lemon Grass	200 ha
	Patchouli & Geranium	1500 ha
4. Flowers:		
	Rose	1625 units
	Lillium	1000 units
	Anthurium	1500 units
	Dry flower	255 units
	Alstroemeria	500 units

The Government of Nagaland has declared 34 villages as 'Vegetable Village', established 12 Model Demonstration Farms on Organic Farming, conducted trainings in Vermi-Composting, Bio-Fertilizing, Bio-Pesticiding and Organic Manuring. The Government has also carried out soil survey and testing activities, and has launched the Nagaland Bio Resource Mission, Nagaland Beekeeping & Honey Mission and Nagaland Bamboo Development Agency. The Nagaland State Institute of Horticulture has been upgraded to Central Institute of Horticulture. Established State Seed Farm at Merapani, State Agricultural Research Station at Mokokchung, Integrated Extension Training Centre at Medziphema and Krishi Vigyan Kendras at Kohima, Mokokchung, Mon and Tuensang.

Farm Machineries were provided to farmers at 50% & 75% subsidy under Agriculture Department & CM's Corpus Fund respectively.

Sl.No.	Particulars	Achievements
1	Tractors	106 nos
2	Power Tillers	911 nos
3	Pump sets	797 nos
4	Power drawn mould board plough	100 nos
5	Paddy thresher	25 nos
6	Sprayers (manual)	400 nos
7	Sprayers (power)	40 nos
8	Self propelled reapers	25 nos
