

AGRICULTURE

Agriculture in a state is better if value added is high on a per capita (rural) basis, if yields of foodgrain production are high, and if the net irrigated area forms a large proportion of the net sown area. Increasingly, cash crops are becoming more and more important in many states and their impact is captured by also including the percentage of cultivated area under cash crops. Electricity consumption for agriculture on a per capita (rural) basis is one measure of usage of new technologies, and overall credit to farmers reflects how progressive farmers are able to use improved inputs as well as better handle their liquidity constraints.

TOP RANKER PUNJAB HAS BEEN MAINTAINING ITS TOP SLOT IN CONSUMPTION SINCE 2003

desperate situation.

Punjab may have emerged as the best among big states for the seventh year in a row but it is no longer invincible. Himachal Pradesh is pushing the envelope of development and growth and could well be the best state next year. Just one parameter, Macro Economy—essentially how it manages its budget—shows the bipartisan commitment of the state to manage resources for growth. If it didn't make it to the top this year, it is primarily because of its geography and its inability to restructure its agriculture. The best news though is from the North-east where Sikkim and Mizoram are wrestling for honours in education and health while Arunachal Pradesh and Nagaland are the emerging success stories. The story of challenge and muscling in for better ranking is the happy end of the story. Then there is the disappointing decline of Kerala, a sad commentary on the politics of the state. Despite remittances, it is losing out as a consumer market and Himachal has ousted it from its pedestal of the nation's best educationist. Yet, it is one of the better governed states.

The sad commentary on the politics and administration of the country is at the bottom

PUNJAB IS THE FASTEST MOVER (2003-09)

Driven by consumerism and a robust infrastructure that includes a vast network of roads bridging the rural-urban divide, the state remains unbeaten in agriculture.
