

CONSUMER MARKETS

Consumer markets are more developed in states that have relatively higher levels of affluence. The definition of affluence itself varies. We take a low cut-off for affluence as that also includes the lower-middle-classes, that is the number of households reporting expenditure greater than Rs 690 per person per month in rural areas and greater than Rs 930 per person per month in urban areas. Television ownership per household captures somewhat higher levels of affluence, and two-wheeler ownership on a per household basis captures an even higher level of affluence. Note that we do not give any weightage to very high levels of affluence. Affluence is not merely captured by expenditures and asset ownership but also by savings and per capita bank deposits.

MAHARASHTRA IS THE FASTEST MOVER (2003-09) Backed by an impressive growth of infrastructure and housing country's financial capital, the state maintains consistency in consumerism.

wholesale market for around 30 major commodities covering textiles, auto parts and machinery, stationery, food items, iron and steel and a bulk of India's exports are routed through Delhi.

The changing landscape of the city involves 59 projects, mainly infrastructure, that are directly related to the Commonwealth Games. A number of flyovers and subways have already eased the flow of traffic. Delhi has also established three new universities: Dr Ambedkar University, National Law University and Delhi Technological University. Several new hospitals have come up in recent years with facilities in existing hospitals being upgraded.

All of this, however, does not take away from some sticky issues that hamper development. The river Yamuna perhaps is the face of this stagnant side, its water body being reduced to a veritable drainage canal. "It is impossible to clean the Yamuna in such a short time. It will take six-seven years more," says Dikshit. It's a candid admission but hopefully, the much-awaited turnaround will come about by then.

HIMACHAL PRADESH

SCRIPTING SUCCESS

- Stands out in Education and Health
- Tops in Macro Economy and Investment

For a state that walked the path of development and industrialisation far later than its neighbouring states, Himachal Pradesh has done fairly well and has set high standards for itself for the future. "It's been a tough terrain," says Chief Minister Prem Kumar Dhumal. "We have progressed inch by inch, rock by rock."

Education has always been a primary focus in the state, with health and roads following close behind. Not content with its enrolment rate of over 20 per cent for higher education (the highest in the country and twice the
