EDUCATION HAS A PRIMARY FOCUS IN THE STATE

national average of about 10 per cent), Dhumal is aiming for the 50 per cent mark. An IIT, a Central university and a National Institute of Fashion Technology. (NIFT) are on the anvil. Three private universities have arrived and six more are set to step in. With a literacy rate much higher (76.5 in 2001 Census) than the national rate, the state has been able to bring down the dropout rate in primary and upper primary education to 0.01.

Himachal Pradesh has believed that roads drive its economy. The state Government is planning to provide all-weather connectivity to villages with a population of over 250 by 2012. In 1948, there were just 288 km of motorable roads; today, 30,000 km of roads are metalled. In 20 months of taking over, the Dhumal Government has already constructed 91 bridges.

But the state has a huge debt burden of about Rs 20,000 crore and its hope hinges on hydropower. The identified hydel potential of the Chenab, Ravi, Beas, Satluj and Yamuna passing through the state is estimated to be about 23,000 MW, about 25 per cent of the total hydel potential of the country. An estimated

LAW AND ORDER

Law and order is critical for a well-governed state. A state with a good law and order climate has an adequate number of policemen—

captured by the variable number of civil policemen on a per capita basis. Justice also requires fewer pending cases and this is captured by the inverse of pending cases as a share of total IPC cases. Typically, states with a poor law and order climate tend to have low reporting of crimes. Violent crimes are also more likely to be reported than non-violent crimes. Consequently, crime rates are poor proxies for law and order. We instead look at three aspects of violence as a measure of governance. As a result, the inverses of murders, kidnappings, rapes and molestations as a share of total crimes are also included.

KARNATAKA IS THE FASTEST MOVER (2003-09)

Despite sporadic violence in the wake of Mangalore incidents, law and order indicators point to a better governance the stable government has been able to deliver.
