Mr Bhupinder Singh Hooda took in hand the ambitious plan of expanding job-oriented technical education in the state. During the last four years, there has been exponential growth of technical institutes in the state. In the year 2004-05, there were only 145 technical institutes offering diploma and degree courses with an intake of mere 24,124 students. But currently there are 489 technical institutes and the annual intake has crossed the one lakh mark, an increase of 400 per cent.

buzzed with activity, up came scores of engineering colleges, polytechnics and ITIs. These seats of learning turned out skilled men and women in thousands. They played a vital role in sustaining the momentum of an unprecedented industrial growth. More importantly, the nearby institutions and a government committed to inclusive development spurred a simple living agrarian community into dreaming big. A dream to see their progenies slip into strip suits, talk in accented English and have it as good as it gets! Many of them lived

these dreams, seeing their sons and daughters lining up for white-collar jobs, hitherto the preserve of their better-educated urban brethren.

In a state where industrial development has taken a leap, the political leadership sensed the need for trained manpower and embarked upon the task. Technically and professionally, trained manpower remains a significant component enhancing the quality of human resources for socio-economic development and infrastructure building in the state.

The Chief Minister, Mr Bhupinder Singh Hooda, says, "Our government is conscious of this fact and its commitment on this account is second to none. As against the six polytechnics and only a single engineering college in 1966 when the state came into being, currently we have 489 institutes imparting professional education. We have two technical universities in the government sector and three in the private sector. We are setting up first-rate management institutes and IITs besides a medical university and an all-women med-
