

BEAT THE MONSOON WOES WITH PROBIOTICS

The onset of monsoon in India is a welcome sign of relief but complimentary to it are some deadly diseases like Diarrhea, Malaria, Typhoid, Hepatitis, Cholera, Dysentery, flu, etc. The gastro intestinal infections are at its peak during monsoons, which break out each year and run havoc through the spines of the country.

It is at this time that we need to take special care of our diet and include foods rich in good bacteria in our meals. It has been globally accepted that taking foods rich in probiotics is one of the best precautions you can take to stay healthy or regain your health, as they war against unfriendly bacteria, viruses and pathogens. Taking probiotics is a way to keep your friendly bacteria population up in full strength so they help you to resist infections.

Sometimes the balance between the good and bad bacteria gets disturbed due to irregular diet, changing season, antibiotics, stress and other environment conditions. Therefore it becomes very important to defend ourselves from the 'unfriendly bacteria' by including a generous serving of probiotic foods available in the form of dairy products. Yakult is one such probiotic drink from Japan which is now available in India. Its efficacy has been scientifically validated through years of research.

Research has indicated that probiotics reduce intestinal bloating, flatulence and discomfort. Prevent traveler's diarrhea, antibiotic associated diarrhea, diarrhea caused due to indigestion etc. Enhance the immune system, improves resistance to infection and thus promotes well being. Probiotics have a beneficial effect on allergic reactions by improving the mucosal barrier function, it also helps in alleviating some of the symptoms of food allergies such as those associated with intake of milk. Protect against certain types of cancer such as bladder cancer, colo-rectal cancer etc. It also help in prevention of Irritable Bowel Syndrome and Inflammatory Bowel Diseases (IBD) such as Ulcerative colitis and Crohn's disease.

In the recent times their requirement has increased as there has been a drastic change in work cultures and lifestyles which has led to rise in the lifestyle related diseases. So don't mortgage your health....include probiotics in your diet and strengthen your immunity

A FEAST FOR YOUR SOUL AND STOMACH

Red coral is a restaurant that offers a wide variety of food from the orient. Everything we serve here is steeped in tradition, from the immense and culinary heritage of china to the distinctive and spicy amalgam of Thai cuisine. From satay kai and nasi goreng to shanghai chicken and crab in oyster sauce...there is plenty to choose from. Each and every dish here is carefully and deliberately chosen and refined by our specialty chefs. Red Coral is a feast for your soul and stomach.

Seeing a lot of potential in West Delhi we took the decision to open another branch of Red Coral in City Square Mall in Rajouri Garden. The only difference this time was that along with the Oriental cuisine we also added Frontier and Pakistani cuisine to our menu.

Can you beat it?

Free Holiday Trip*
