

Tonic for a stress free life

More often than not, it's the medical expense that is more devastating than the disease itself. For millions of workers employed in India who are earning upto Rs. 10000/- per month, the devastation of a disease is irreparably tragic. Precisely why ESI Act was enacted – to safeguard India's workers and their dependents against health and accidental adversities. At the cost of a tiny contribution from their salaries and another from their employers, employees and their dependents get free medical treatment at ESIC's countrywide network of hospitals, annexes, dispensaries and associate super specialty hospitals. Even loss of wages due to illness or accident is compensated for. No wonder that India's workforce today is getting total 'Chinta Se Mukti'.

- Largest healthcare network • 144 hospitals with 23,923 beds • 1,397 Dispensaries • 1,753 panel clinics
- 300 diagnostic centres • 42 ESI Annexes with 849 beds • 7,099 insurance medical officers • 1.21 crore insured persons/family units • Approx. 4.69 crore beneficiaries.
