

NRHM - MAKING A DIFFERENCE EVERYWHERE

The response of the States and UT's in crafting a credible public system of health has been exceptional. Hon'ble prime minister, Dr. Manmohan Singh launched the flagship programme NRHM in 2005 and its short journey of three years, NRHM has succeeded in creating a new confidence that the public system can deliver quality services. There has been a significant increase in out patient cases, Institutional deliveries, immunization, family planning services, availability of drugs, diagnostic services, emergency transport arrangements, etc., in most of the States and Uts.

Innovations characterize NRHM and every State / UT has tried to tailor NRHM as per its felt need. The strength of NRHM has been its flexibility. We are confident that in partnership with states, NRHM will achieve its objectives and goals and will accelerate

India's Quest for achievement of the Millennium Development Goals by 2015.

NRHM has led to increase in out patient cases, institutional deliveries, immunization, diagnostics, medicines availability and in patient care in nearly all the states .Public systems are well looked after in many states and this has led to people developing confidence in our hospital, CHCs and PHCs.
