

ART EXHIBITION

Nature in Sculptures

The wait has been seven long years. But Kolkata's art enthusiasts will find it worthwhile. Shuvaprasanna's solo exhibition at Gallery Sanskriti not only showcases the master's signature series from his older works but also his new paintings where he has depicted animals and insects in powerful graphics. For his fans, there is more. He has created stunning pieces in bronze, unlike his previous works of charcoal. Again, he has drawn inspiration from animals and nature. The exhibition is on till November 29. *by Elora Sen*
