

Dr C.Palanivelu is invited to perform surgery in those countries.

Recently, Dr C.Palanivelu conducted surgeries in Liverpool, London & Pittsburgh, USA that surpassed others performances, benchmarking his expertise.

Also, Dr C.Palanivelu is going to perform an operation in June 2009 at Italy.

DR. B.C. ROY NATIONAL AWARD

Being the Indian luminary in the field of Laparoscopy Dr.C.Palanivelu, Director of Gem Hospital received the award from President of India Shrimati Prathiba Patel in 2008 under the category of specialty development in laparoscopic Surgery.

INTERNATIONAL OLYMPICS IN SURGERY - SILVER MEDAL FOR DR PALANIVELU

At the first ever Olympics for Surgery, jointly organized by the America and Japan at Phoenix, Arizona, USA, Dr Palanivelu, Director of Gem Hospital did the honors of being placed second and won the silver medal.

OUTREACH PROGRAMS FROM GEM HOSPITAL

The GEM hospital has instituted a trust where they conduct various welfare programs for the economically disadvantaged, the key program in this being the Rural Mobile Clinic program conducted every two months, where 1000 patients are treated at no cost.

LAP SURGERY BENEFITS

Laparoscopic procedures have helped minimize chronic pain due to adhesion, incisional hernia and the post op care is easier. Thanks to improved visualization and magnification surgeries has now become accurate and blood less. This has encouraged many to have their regular check ups done and appropriate interventions are done by the health care provider.

BOOKS & RESEARCH PUBLICATIONS

More than 80 innovative research articles from GEM hospital have been published in the international journals. Dr. Palanivelu authored five world class books on laparoscopic surgery, hernia and digestive cancer. The text book of laparoscopic surgery was released in 2006 by the Dr. A. P.J. Kalam, former President of India. The foremost among the books are:

1. "ART OF LAPAROSCOPIC SURGERY" - 1998

Prof.T.E. Udawadia, Founder President, IAGES, in his foreword states

that "The goal of laparoscopic surgery is to perform standard, classical open surgical procedures via the laparoscope, and perform them just as well if not better. Dr.C. Palanivelu has achieved this goal with outstanding success in the full spectrum of abdominal surgery.

2. "PALANIVELU'S Text book of Surgical Laparoscopy" - 2002

Prof McMahon, Professor of Surgery, University of Leeds, UK in his foreword states that "This book gives a detailed description starting from basics of laparoscopy such as the operating room set up and instruments to a thorough explanation of advanced and complex laparoscopic surgical procedures. Dr Palanivelu is an outstanding surgeon with extra ordinary skill, difficult to match by others".

3. "CIGES Atlas of Laparoscopic Surgery" - 2000, 2003

Prof Barry Salky, Professor of Surgery, Mount Sinai Medical Centre, New York, opines "I am certain this text book will become an important reference tool for general surgeons around the world for a long time to come".

4. "Operative Manual Of Laparoscopic Hernia Surgery" - 2003, 2009

Operative manual of laparoscopic hernia surgeries that includes more than 400 color photographs, and multicolor illustrations which is truly a milestone in the laparoscopic hernia surgery. Steve Nixon, of The Royal College of Surgeons Edinburgh, United Kingdom opines that "They say that those who can - do; and those who can't - teach. Occasionally one individual has the ability both to do and to teach. Professor Palanivelu is such an individual".

5. "Art Of Laparoscopic Surgery - Textbook And Atlas" - 2005, 2008

A comprehensive book which covers the entire spectrum of laparoscopic surgery right from basics to the most advanced laparoscopic procedures. Prof. Jacques Perissat states that "Prof. C. Palanivelu, prominent Master - Teacher in laparoscopic surgery, provides an additional reason to the world community of laparoscopic surgeons to pay a great tribute to the Indian surgeons for their huge contribution in the development of minimally invasive surgery. To become educated, read good books and visit good masters. The surgeons looking for good education in laparoscopic surgery will now know the books that they have to read and the master they have to visit".
