

# VIKRAM ENT HOSPITAL

## Vikram ENT Hospital The Pioneers. Forever.

38 years of surgical skills,  
cutting edge technology &  
outstanding results ...

Generations of satisfied patients...

### Hear without Hearing Aids

**Vibrant Soundbridge Implant** : Introduced for the first time in South Asia, the Vibrant Soundbridge Implant is the first real alternative treatment for mild to severe sensorineural hearing loss (nerve deafness). It is a boon for persons wearing acoustic hearing aids and are experiencing a disturbed blocked feeling in the ear, occasional whistling, physical discomfort, unnatural sound quality of voices and sounds, etc. For patients who are not happy with their hearing aids who desire something cosmetically superior this is the newest treatment option. Such individuals can meet our internationally trained Vibrant Soundbridge specialists, for their expert advice on the scope of this implant. The patients can resume their normal activities within a few days after this 2 hour long implant treatment.

SAY GOODBYE TO SINUS PROBLEMS, HEADACHES WITHOUT SURGERY WITH NEW BALLOON SINUPLASTY

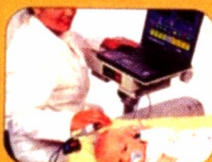

AVOID OPEN SURGERY WITH LUMENIS COMPUTER GUIDED NAVIGATIONAL CO2 LASER TREATMENT  
FOR PRESERVING VOICE/ORGANS IN CANCERS OF THROAT/MOUTH

Carl Zeiss Sensera Microscope

Vikram Hospital serves as a **referral hospital** for centres all over India and abroad, like the **U.S., Europe, Gulf and the Far East**. It enjoys the distinction of being the **first hospital in South Asia** to introduce **KTP / 532 AURA** - the most advanced **Non-Invasive Laser Surgery** which is **bloodless and scarless** and **CARL ZEISS Sensera Microscope** for precision surgery.

M.A.S.T.E.R

**Audiology Department**: of highest international standards with **M.A.S.T.E.R.** which is superior to **B.E.R.A. / O.A.E.** as it tests both ears simultaneously in new borns and children. For the first time not only can you assess if your baby has a hearing loss or not, but also the exact extent. This helps us achieve greater accuracy in prescribing corrective measures for a child to have normal speech & language development.

**The Cochlear Implant Program** : Cochlear implant is a computerised bionic ear by which even completely deaf children and adults can hear. Intensive Speech therapy at **PGV - Integral Ear Institute** for hearing impaired children and adults, providing them a disability-free life.
