

years. Inspired to start a foundation in the memory of her sister, she founded the Chandrakala Venkatswamy Maternity & Well Women Foundation, where health care for pregnancies are provided at patient friendly costs.

This idea took shape when she realized that pregnancies in India were dreaded or given the kid glove treatment, unlike a scenario where a pregnant woman was treated with holistic approach of counseling, Parentcraft classes, Antenatal and Postnatal Yoga and diet awareness, incidentally, as a first, Dr Sooriya introduced pregnancy yoga in the country. This comprehensive approach coupled with the best treatment led to a very receptive audience and excellent results. Dr Sooriya Sreekumar smiles tenderly when asked about motherhood "it is sacrosanct and yet a beautiful experience that can be shared"

Dr Sooriya has this to say when asked about c sections which have become the order of the day "apart from the known high risk pregnancies where intervention and medicines are needed, the other side is to do it the natural way, with the right inputs from the primary health care provider, handholding is very important during the pregnancy and we, at Sooriya hospitals encourage active spouse participation during the full term and after"

The one area of concern is where Dr Sooriya wants all the parents to be actively involved is sex education awareness for teens. In her opinion, the taboos that surround this grey area should be cleared for a healthy growing up process.

The Sooriya Hospital aims to work in partnership with you throughout your pregnancy, offering all of the services you will need including full antenatal care, your preferred or medically required delivery option and your postnatal care needs.

17 years ago, HOSMAT was established in Bangalore, this is a super-specialty hospital for Orthopedic, Neurosurgery, Neurology, Spinal Surgery, Sports Medicine, Arthritis, and Accident - Trauma with a full-fledged diagnostic facility, which includes CT scan, MRI Doppler, EEG, ENMG, Ultra Sound, Bone Densitometry & State-of-the-art Physiotherapy Center.

HOSMAT, located in the heart of the city and has a modern and spacious building with state-of-the-art equipments; it was one of the first hospitals in India in 2004 to have a Computer navigated Surgery System for Joint Replacement, Spine, Neurosurgery, and Accident Trauma. It has over 350 beds with Economy, Semi-Private, and Private rooms, Deluxe and Executive rooms. There is a fully equipped ICU with 22 beds, 12 Operation Theatres, fully equipped with controlled exponential multiple laminar airflow system, and hence has an extremely low rate of infection, the lowest in India. The emergency and casualty department functions round the clock. HOSMAT has 30 orthopedic surgeons trained in the U.S, U.K Europe and top colleges of India, taking the health care region to new heights.

The super specialty hospitals have the timings and equipment under their purview, the main advantages being time scheduling for operations, latest equipment for specific diagnosis. This decentralization of medical care has enabled the hospitals to be innovators of solutions addressing the health issues.
