

Bharath university

A Knowledge Center of the future

Who told that Education is merely a tool for employment? Bharath University has drastically changed this perception! This University has made it its mission to show the world that education is man-making and character-building. The students who graduate from this university not only walk out with immense knowledge, but also as masters in the "art of living" who are prepared to face any challenge with determination without compromising their culture and values of life.

This would not have been possible without the able leadership and guidance of the present chancellor of this university and former M.P, Sri. Jagathrakshagan.

Though it began modestly as a small Engineering college, it has now blossomed into a full-fledged university and is still spreading its wings far and wide. When foreign universities are vying with Indian universities and alluring students with sophisticated comforts, Bharath university has proved that it can match the foreign universities by providing not only quality education but also the essential world-class infrastructure.

Situated in the picturesque Selaiyur in Chennai amidst huge green pastures in a majestic and architecturally aesthetic building, Bharath University is most definitely the cynosure of all visitors. It contains hi-tech classrooms, specially designed labs, a state-of-the-art library, sophisticated multimedia training facilities, conference halls, in-house gym and recreation centres, well-equipped hostels, modern canteen and first aid centres, and provides a self-contained campus with all modern facilities.

A safe and secure future

In the current times, when good jobs are hard to come by, the focus of parents is not only quality education, but also placements for their kin in multinational companies upon

course completion. Bharath University assures quality education to the students, and through the untiring efforts of its "placement cell", also provides its students the opportunity to work for leading companies like Alsec, Infosys, TCS, Polaris, HCL, I-Flex, Wipro, Sify, CTS, Seimens, IGATE, Honeywell, Hindustan Motors, Hyundai, Ford, and Ashok Leyland.

This placement wing is planning to conduct a mega fest in collaboration with multinational companies for placement opportunities as a regular feature. Further, foreign universities like California University, Texas ASM, Minnesota

State University, Cornell University, Iowa university, Melbourne university, and Northampton university, are planning to develop joint educational programmes.

Employable Students

The students are specially trained for the requirements of industries. They are not only "knowledgeable", but also "employable". There is a special "communication and personality development" wing, which works towards enhancing the communication and leadership skills of students, so that they emerge as efficient managers of tomorrow. Special evening classes for German, French, and Japanese are conducted for improving their job opportunities in Europe and Asia.

Special features

The strength of this university lies in the relationship amongst the juniors, seniors, professors, and parents. The rapport they share develops friendliness, and nurtures an environment

conducive for healthy discussions and easy accessibility to guidance from knowledgeable quarters. Parents can meet up

Dr. S. Jagathrakshagan
Chairman, MA, D.LITT
