

A GATEWAY TO PROFESSIONAL LIFE

The great American educator Theodore Hesburgh said this of leadership: "The very essence of leadership is that you have to have vision. You can't blow an uncertain trumpet".

Meeting Mr. Anand Jacob Verghese, the Pro Chancellor of the Hindustan University at his well-appointed office on the campus, epitomizes this essence of leadership. Having recently attended an international seminar on aerospace applications, under the aegis of TIFAC (Technology Information Forecasting Assessment Council, a government body), where the focus was on development of composites with relevance to aircrafts, he has set his sights to flying higher in the horizon of aeronautical engineering. With this in view, he is setting up a technology park on the campus of the Hindustan University, to facilitate aeronautical engineering knowledge transfer. We settle down to trace the path of competent technical education.

Sir, what is the support from the scientific community to education, especially regarding aviation?

We, at Hindustan University, have a student oriented approach to education, and appreciating this, TIFAC has instituted a Centre of Relevance and Excellence (CORE), under the aegis of Dr. Abdul Kalam's vision 2020, for the aircraft and avionics wing in the field of Aircraft Maintenance.

This has helped the students to develop a high level of expertise with the added advantage of appropriate industrial exposure in aircraft maintenance.

Mr. Anand Jacob Verghese
Pro – Chancellor and Chief Executive

Dr. K C G Verghese's vision of aviation education has taken shape in the form of an UGC approved university, can you tell us- What constituted the growth of the Hindustan University?

Dr. K C G Verghese, my father, was a visionary in the field of education. He established the Hindustan Institute of Engineering Technology (HIET) in 1966. This institute answered the need for non-formal technical education. Hindustan Institute of Engineering Technology is run by the HETC (Hindustan Engineering Training Centre) Educational society and is registered as a Technical Education Society under the Societies Act, XXXI of 1860. The Institution is approved by the Director General of Civil Aviation, Government of India, for conducting Aircraft Maintenance Engineering Course and by the AICTE (All India Council for Technical Education) and the Government of Tamil Nadu for conducting Diploma courses in Automobile, Computer and Mechanical Engineering.
