

A VIBRANT B.S. ABDUR RAHMAN UNIVERSITY FOR LEARNING AND DEVELOPMENT

The year 1984 was a landmark in the annals of learning, when Crescent Engineering College was started amidst the greenery of Vandalur, in Chennai. After completing 25 years of imparting quality education, the college has been granted University Status. Today, the B.S. Abdur Rahman University is a place where universal values are stressed upon and the main focus is on; academic commitment and excellence, tolerance, breadth of interests, and a desire to contribute to the development of the university and the nation.

AREAS OF EXCELLENCE

The University has Five Schools of Engineering, Mechanical and Building Sciences, Electrical and Communication Sciences,

Dr. P. Kanniappan
Vice-Chancellor

Computer and Information Sciences, Electrical and Communication Sciences, Business and Management Sciences, and School of Humanities and Sciences. The School of Islamic Studies is another recent addition, where all that has to be known about the religion of peace, will be imparted. To facilitate learning, scholars from all parts of the

world will be invited to discuss on contemporary topics in their relevant field of specialization.

The University is concentrating on three dimensions of Learning, namely, Teaching, Research, Extension and Consultancy. The Centre for Sponsored Research is actively engaged in attracting National and International funding for Innovative Research and Development of the University.

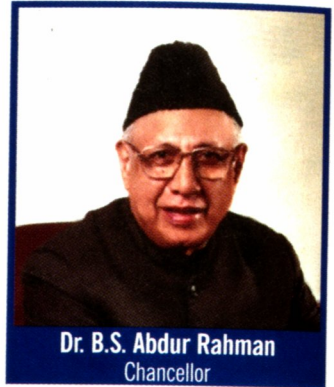

The Energy and Environment, Nano-Technology, Bio-Technology programmes of Teaching and Research will go on stream in the near future. The outreach programs of the B.S. Abdur Rahman University will start off with the establishment of off campuses at Noida and Tuticorin, and overseas campuses at Dubai and Malaysia.

GLOBAL FOCUS

There is good news for all those who want the facilities that are available abroad, the University is planning for a Center for International Collaborations, in the academic areas, with top-class Universities of UK, USA, Australia, to name a few. This will fulfill the global need and supply of employable human resources.

A special mention needs to be made of the IAS academy started by the University, which trains students to become able administrators in the country.

The Vice Chancellor Dr. P. KANNIAPPAN, takes pride in the systematic growth chart that the University has been able to achieve, as a result of which the students of B.S. Abdur Rahman University achieve excellence, whilst engaging in a range of activities and pursuits that help them develop as individuals to contribute to society when they leave here and step into corporate portals.

Dr. B.S. Abdur Rahman
Chancellor
