

# WHERE THE VISION MEETS ACTION LEADING TO ACHIEVEMENTS PAR EXCELLENCE

**H**ad it not been for a strong desire to elevate the standard of professional education in the region, Sangrur wouldn't have perhaps ever got an opportunity to witness the creation of 'Bhai Gurdas Group of Institutions', which has now evolved into something that can be best described as the "educational-pride" of Sangrur. Into its tenth year of existence now, Bhai Gurdas Group of Institutions, offers a multitude of professional courses in the fields of Management, Engineering, Polytechnic and Law; and is also coming up with a B.Ed course from the next session onwards.

What started off as only a management institute in the year 1999, soon took a shape of a huge educational campus and now stands tall at the Sangrur-Patiala National Highway. This vivacious campus is spread across an area of 40 acres and the sprawling lush green lawns, right at the entrance, are there to greet you through this awe-inspiring abode of quality education-where the vision meets action leading to achievements par excellence!

Unnerved by the rapidly changing trends of the markets or global meltdown, BGIT continues to provide 100% placement to all its eligible students. For the record, in a span of last two years only, 52 top-notch companies have visited the campus to recruit the talented, skilled and professionally 'smart' BGITians, who're ready to take on the world with their scintillating technical and intellectual prowess. TCS, Infosys, HCL, Vodafone and Tech Mahindra are just a few of those big names which have provided excellent packages and growth opportunities to the graduates and post-graduates from BGIT – an institute which has now earned the distinction of being one of the finest engineering institutes that are affiliated to Punjab Technical University. BGIMT, the sister institute of BGIT is also maintaining brilliant placement record by providing enviable placements to MBA and MCA students.

With such a terrific placement-record behind their back, one can't resist the temptation to find out the driving force that thrusts the institute to produce such remarkable results. "The whole educational process in BGIT revolves around not just providing the students with the tools to reach academic excellence but also all the relevant inputs, to carve a niche for themselves in the 'real' world," says Dr. Tanuja Srivastava, the Director-BGIT. After taking a deeper look at the infrastructural and pedagogical support that the institute

has to offer, it becomes very easy to figure out as to what those 'relevant inputs' are. An actively functioning 'Training & Placement Cell' supervised by a team of around 20 expert members, is there to provide training, placement and career development opportunities to the students by organizing campus interviews, industry-institute interaction activities, workshops, and grueling training sessions for the preparation of interviews, group discussions, resume-building, development of soft skills etc. "All these activities keep happening year-round and contribute a lot in maintaining BGIT's reputation as the best institute in the region, as far as the campus placements are concerned," says Guninderjeet Singh Jawandha, the Dean Colleges. "Not just restricting it to the final year students, we even encourage the freshers to get involved in these grilling yet highly enjoyable training sessions", he adds.

**My dream of excellent career has come true!  
Now I am with Nortel Network Ltd, Gurgaon at a  
package of Rs. 9 lac. per annum. I am indebted  
to BGIT, my alma mater for what I am today.**
