

star rated, Bio Sleep Plus Air Conditioner range, comprising of 18 Split AC and 7 Window AC models, is differentiated on account of the unique Biosleep and Comfort Care features. The 2009 Split AC range from Samsung is available across the premium Vivace Plus, the deluxe Crystal and the standard Max series.

Some of the key features of this BEE Star rated Split Air conditioner range include its Bio Sleep feature that ensures uninterrupted sleep since it works with the body's bio rhythm and adjusts the room temperature according to the natural needs of the body ensuring that the user wakes up refreshed. Its other important Comfort Care feature not only provides powerful cooling power but automatically adjusts humidity so that the users are comfortably cool. The new Comfort Care technology in the Samsung ACs adjust the room temperature depending on the percentage of humidity and maintains the most comfortable room temperature. These AC's are also designed not just to cool, but also ensure the least wastage of precious energy and hence the range has a Smart Saver mode which ensures the air conditioner cools the room in the least time automatically. Thereby saving electricity and the need to repeatedly switch on and off the AC to save electricity. These ACs also use a unique Ultra Tropical Rotary Plus Compressor that ensures the AC delivers superb performance even in temperatures of up to about 54 degrees Celsius. The multi step filter system of the Samsung Air conditioners ensure healthier indoor environment by filtering out more pollutants from the indoor air. All above goes to showcase Samsung's philosophy of focusing on environmentally friendly technologies to make the world a more beautiful place in future.

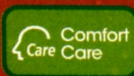

The Air Conditioners when paired with specialized windows that offers a number of benefits over conventional wooden and aluminum windows thus greatly improving cooling during summer. Fenesta windows are engineered to suit the Indian climate – these windows can withstand torrential rains and high-speed wind, which makes them ideal for high-rise buildings and heavy monsoon areas. Fenesta has introduced a special blend that makes the windows more durable, prevent fading under extreme ultra violet rays and the windows retain luster under high temperatures.

Voltas has announced the launch of an entire range of room air conditioners fulfilling the basic need of cooling, aesthetics and addressing a more pressing need towards energy conservation. Voltas AC boasts of a state of the art energy efficient compressor that uses electricity wisely. Add to it various power saving technologies and there is an AC that ensures perfect cooling, while keeping the running cost minimum. The first of its kind corner AC called Vertis 'Pristine' with a unique, triangular shape is designed to fit discreetly on the wall in the corner of a room. Vertis Panache is yet another offering replete with DC Inverter technology and an environment friendly CFC free R410A refrigerant. The windows range is available in one, two and three star categories replete with blue hydrophilic fins; Inner grooved copper tube and an easy clean panel.

Apart from keeping your home interiors cool, you may like to spend some time in the malls and multiplexes. The major malls and shopping complexes are all air-conditioned. You could also hit the air-conditioned local library, and read a good book. A dip in the neighborhood swimming pool is another great idea to chill out!

Comfort Care keeps you relaxed all day long.

- Accurately measures humidity and room temperature
- Maintains an ideal temperature and comfort level
- Keeps you cool and comfortable all through the year
