

anonymity, Faridabad is finally calling the shots. Content with the fame for its annual Suraj Kund Mela and Badhkal Lake, Faridabad chose to step aside and allow neo-cities like Noida and Gurgaon to hog the limelight. Today, it is being touted as NCR's hottest property. The signs of all-round development are there for all to see - the upcoming Metro rail, Badarpur Flyover, the six Lane NH2, and Western Express Highway linking Kundali to Palwal via Manessar, and the Eastern Express Highway from Kundali to Palwal via Ghaziabad.

This progressive city today boasts of a dynamic population — which is affluent and fast growing — thereby fuelling its demand for quality business. The city has gained from the stepping up of infrastructural development all around NCR and also from the fact that the Haryana Urban Development Authority (HUDA) is increasingly concentrating on it. The city is close to Delhi and is flanked by Noida and Greater Noida, making it a catchment for those who work there. The Faridabad market is now seen as an ideal locality for long term investment.

The city, till sometime ago considered to be a sleepy industrial town, is now buzzing with activity. Investment worth crores of rupees is likely to be made by the Haryana Government. Faridabad has been chosen by the Prime Minister under the Jawahar Lal Nehru National Urban Renewal Mission and Rs. 2800 crores allocated under this scheme for improvement of Faridabad's road, sewerage & water systems, street light, sanitation, storm water drains, solid waste management. Also there is a proposal of setting up of new Industrial Model Township by the Haryana Government at Faridabad and Rohtak. State Government has granted land for the IMT project for Faridabad.

Faridabad has an established urban and social infrastructure in place and is quite well populated. This resurgent interest is expected to augur well for the suburb. Also, Faridabad's USP is that the realty prices are still affordable and even lower than that of Gurgaon or Noida.

Faridabad is equipped with modern amenities like schools like Apeejay School, Carmel Convent, Delhi Public School, Tagore Academy and Modern School to name a few excellent modern hospitals like Metro Hospital, Fortis, Escorts and Apollo Hospitals.

Metro Heart Institute, Faridabad

Metro Heart Institute, Faridabad is the first fully equipped heart institute in Haryana this was started in February 2002. It is (an ISO 9001:2000) certified 70 bedded state of the art and centrally air-conditioned super specialty heart institute which is providing the highest level of cardiac treatment like Angiography / Angioplasty with Stenting, Bypass / Open Heart Surgeries, Valve Replacement, Permanent Pacemaker Implantation, Closure of Heart Holes Surgical / Non Surgical etc. They also have GE fixed Cath Lab (USA),

Echo with Colour Doppler, Treadmill (Marquette) Bed Side Monitors (GE) and Ventilators (Siemens). There are 14 Critical Care Monitoring beds and well equipped operation theatre. The team of qualified doctors is available round the clock.

They are also coming up with a 200 bedded multispeciality hospital in Faridabad within 3 months where other than heart treatment all kinds of facilities will be available under one roof like Brain surgery / Ortho surgery / Gynecology / Dental / Eyes / Pediatrics / Kidney department with dialysis / Urology and Medicine etc.

In new setup metro hospital intend to promote medical tourism. They want to attract foreign patients to take treatment from them. All advance latest technology medical equipments will be available and international standard care will be also provided as per NABH norms.

The pace at which the industrial town of Faridabad is developing it is expected to surpass the real estate growth of other satellite towns of the region and become the next hot destination for expanding developers.
