

Mr. K. C. Lakhani
Chairman

Another major industrial group of Faridabad is the Lakhani Group of Industries. The group started in 1966 by Mr K C Lakhani is one of India's largest manufacturers and exporters of footwear. The group also has the distinction of being one of the largest suppliers of rubber auto components to major automobile players in the market.

Lakhani Armaan is totally customer oriented. The company prides itself in giving the customer stylish and quality products at an affordable price. In fact today, the brand Lakhani Armaan Shoes is synonymous with durable, sturdy and affordable footwear. The group is also manufacturing sports shoes for multi-national footwear brands

like Adidas, Reebok and Converse, along with their own brand, "Touch".

The Lakhani Armaan brand has built itself a domestic reputation of product quality and operational reliability which it has also offered to the International market. The company has established 10 infrastructure plants in five different states namely Haryana, Rajasthan, Madhya Pradesh, Uttar Pradesh and Uttaranchal Pradesh. Lakhani Armaan employs about 4000 personnel who are well-trained in their respective production activities including 500 officials spread over all 10 manufacturing units and the corporate office.

The vision of the founder has been the driving force behind the success of the group. The company policy is to manufacture simple affordable quality products which suit the pockets of the common man.

by Mr. K. C. Lakhani

The Lakhani Armaan brand has built itself a domestic reputation of product quality and operational reliability which it has also offered to the International market. Our products are being exported to U. K., Netherlands, France, Germany, Switzerland and Spain and many other countries. For exports, the company

follows international standards of quality like BSI, ASTM, SATRA etc. Apart from in-house testing, the products are also tested at I.TS & SGS. Lakhani Rubber Works was the first of the Lakhani Armaan manufacturing facilities which started as a small venture to manufacture rubber components in 1966. Today it has the distinction of being one of the largest suppliers of rubber components

Mr. Gunjan Lakhani
Managing Director

and hoses to the major domestic automobile manufacturers in the market. It is an ISO/TS16949:2002 company.

Faridabad area boasts of world's Largest Backhoe Loader Plant JCB which is in the process of further expansion.

JCB started the production of Construction & Earthmoving machines in India with a joint venture in the year 1979. Now JCB India Limited is a 100% owned subsidiary of JC Bamford Excavators Limited, one of the leading manufacturer and supplier of Construction equipment in the world. It is the largest industry in the Faridabad belt.

JCB India, now home to the world's largest backhoe loader factory, has a market share of 75% for this product in India which it pioneered here in 1979. JCB backhoe loader is world number one with one in every three backhoe loader sold anywhere in the world being a JCB. JCB India's total market share in the construction equipment product range in which we compete in India is 53%. JCB India has sold over 80,000 machines in India and is the first Construction Equipment manufacturer to have ever done so in this country. One out of every two machines sold in India is a JCB.

JCB's World's largest Backhoe Loader manufacturing facility at Ballabgarh in Haryana was recently expanded and subsequently inaugurated by its Chairman, Sir Anthony Bamford. Apart from this plant in Faridabad, JCB has two plants in Pune.

- Plant-I, is a component manufacturing plant and is export-oriented. It caters to the needs of JCB factories both in India and abroad.
- Plant-II is a Heavy Line manufacturing plant that produces Excavators, Wheel Loading Shovels and Vibratory Compactors.

It also has India's largest Parts & Technical Training Centre for construction equipment in India.

It has a complete range of construction machines that work in a number of applications; whether it is building new roads, flyovers, moving earth to build power plants, dams, commercial & residential complexes and other engineering constructions. The product range includes-

- Backhoe Loaders
- Excavators
- Wheeled Loaders
- Skid Steer Loaders
- Telehandlers
- Compactors

Staying in step with new concepts and up-gradations in Indian real estate, Faridabad is seeing new developments especially in the residential segment. Well on its way to developing itself into a self-sufficient world-class township, Faridabad is one of the most sought after destinations in Delhi-NCR today.

Faridabad has faced a lot of challenges in development but the town has a "can do" spirit which helps them surmount obstacles and march steadily towards progress.
