It's a country forever seething with change, where the old doesn't give way to the new, but subsumes it like a juggernaut. The stories never stopped coming, the pages remained as alive and vibrant as the nation. Some narratives turned around completely in time, from the telephone-waiting of the 1980s to the call-waiting of the 1990s, and from the blood of Bluestar to the peace of Punjab. Others were bizarre in a very Indian way: monkey men, milk-drinking idols, weapons falling from the sky and an alchemist of petrol. Politics remained a theme, ebbing and flowing with elections and defections, spawning enduring slogans and convenient deals. Security had its failures, but there were profiles in courage and portraits of valour. Great speeches were delivered; other things were better left unsaid. INDIA TODAY was there, capturing every mood, telling every tale, chronicling every moment.
