

Ayurveda for stock investors

(How to prevent unhealthy market practices)

According to ayurveda, prevention is better than cure. Here are the preventive steps you must take to keep your investments in the pink of health.

Do's

1. Deal with market intermediaries registered with SEBI/Exchanges only.
2. Insist on contract notes from your broker. Verify their genuineness on the Exchange website.
3. Check the company's credentials, recent announcements and disclosures under various regulations before you place your stock order with market intermediaries.
4. Carefully go through the Risk Disclosure Document, a part of the investor registration requirement for dealing with brokers.
5. Beware of stocks, especially low-priced stocks, that show a sudden spurt in price or trading activity.
6. Remember that there is no such thing as guaranteed returns on stock investments.

Don't's

1. Don't rely on rumours or 'tips'.
2. Don't allow yourself to be swayed by companies armed with approvals / registrations from government

agencies: the approvals may not have anything to do with the securities you intend to buy.

3. Don't keep your Demat transaction slip book with any intermediary.
4. Don't get carried away by the onslaught of advertisements about the financial performance of companies in print and electronic media.
5. Don't blindly follow media reports on corporate developments.
6. Don't blindly follow the investment decision patterns of other investors.

At BSE, we have installed a toll-free line for investors. Just dial 1800 22 6663 to provide information about any unhealthy market practice.
