

"For 25 years, we have embraced eager young boys and girls into our portals, and seen them leave as responsible men and women, honed by our holistic education to become leaders... Our Silver Jubilee celebrations are of special significance as we salute the stars who have done VIT proud: our bright, ambitious and focused students from all over the world, and the committed teachers who have shaped their destiny."

G. Viswanathan
Founder and Chancellor

A view of the Technology Tower

VIT - A place to learn; A chance to grow

VIT's commitment to excellence in fundamental and developmental research encompasses emerging fields like biomedical research, information technology, nanotechnology, optoelectronics and materials engineering; research in basic sciences, applied sciences and biosciences, as well as participation in international research collaborations.

IDEAL SETTINGS

In the vast green 350 acre campus at Vellore, the institution's focus on all-round development encourages a vibrant interest in extra curricular activities, turning students into well-rounded personalities able to hold their own anywhere in the world.

With its focus on individual attention, world class leadership and character building, VIT's biggest

gratification is to see its students set firmly on the path of improving the quality of life for the human race. No matter where in the world they go.
