

After changing from naturopathy
to reflexology to homeopathy,

you're finally happy
to be changing nappies.

IN VITRO FERTILIZATION CAN NOW HELP YOU CONCEIVE

Many couples are finding new hope and being blessed with babies - thanks to the expertise at the **Fortis Bloom IVF Centre**. Now an acclaimed doctor with over 18 years' experience, a success rate of 40-50 % (with women under 35), and a team of skilled specialists, can help you become a parent too. At Fortis La Femme, we have a warm, comfortable environment and our IVF procedure is

safe and effective - quite like some other techniques we use to help you conceive:

- Intra Cytoplasmic Sperm Injection (ICSI) • Assisted laser hatching
- Egg donation • Oocyte freezing and banking • Fallopian tube recanalization.

So if you've been unable to have a baby, your life may soon change.
