Just One Goal...

...the Right to Free and Equal Education

Half of India's children don't go to primary school, and with poor systems, the other half is hardly learning either. The **CRY Cadence Corporate Citizenship Challenge** continues to be a platform for the belief shared by CRY - an organisation that brings about lasting change in children's lives, and Cadence - a socially conscious corporation, that every child must get an equal chance to learn. Competing in various sport, the Corporate teams taking part in this challenge are doing their bit to ensure every child's right to education. You can too - by donating, telling others of our cause ... or even just cheering the teams on.
