

ALTERNATIVE THINKING ABOUT FLEXIBILITY:

Regardless of what state your business is at, HP has just the right server for you. Featuring the latest Quad-Core AMD Opteron™ Processors, our servers range from affordable solutions that offer ease of management for growing businesses, to high-end solutions that are able to handle complex applications easily. Together with the optional HP Insight Control Environment (ICE) software, you'll be able to link existing workloads, manage desktops, optimise power and regulate heat consumption – all from a central environment. Giving you excellent performance-per-watt, better business continuity, and I.T. that evolves with your company.

Technology for better business outcomes.
