

AWHOLE NEW WORLD

With the nuclear deal making a strict segregation of its civilian and nuclear facilities, the two can now proceed to develop independent of each other and without too much hindrance from other countries

IMPORT LIST

NUCLEAR FUEL

With its reactors crippled by the shortage of uranium, India now has the option to import it from a host of nations.

NUCLEAR REACTORS

The largest Indian reactor is 700 MW. Other countries offer reactors ranging from 1,000 MW to 1,600 MW.

REPROCESSING TECH

India is looking for collaborations in both reprocessing technology for spent fuel and enrichment technology.

THE BIG SELLERS

USA

Westinghouse and GE, the big two US companies, are expected to bag two reactors each.

RUSSIA

Rosatom is likely to sign by December an agreement to sell four more nuclear reactors.

FRANCE

Areva, the French giant, is negotiating for a cluster of six 1,600 MW plants to be set up.

NUKE NUMBERS

4,100 MW

is the current nuclear power capacity.

22

reactors India has right now.

10,000 MW

reactor capacity to be imported in five years.

30,000 MW

is the target to be achieved by 2020.
