

KYOCERA MITA SETS UP SUBSIDIARY IN INDIA

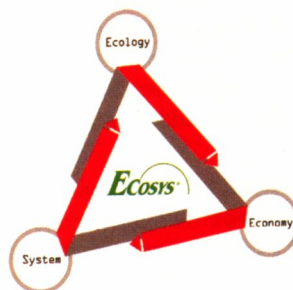

With a rich history spanning nearly five decades, Kyocera has pioneered the use of fine ceramics as an alternative to steel and plastics and developed market leadership

in semiconductors, telecommunications equipment, optics, electronic devices, cutting tools, automotive components, medical products and solar energy.

With 189 affiliated companies, Kyocera employs 66,500 people in the world. The company was established in Japan in 1959. In January 2000, Mita Corporation was reorganized to become Kyocera Mita Corporation, offering the entire range of Documentation Devices and Solutions to the customers.

The company made its entry into the growing Indian market in March 2008. Kyocera Mita India Pvt Ltd. (KMID) was formed on 4th March, 2008 as a wholly owned subsidiary of Kyocera Mita Corporation, Japan. This will enable KMID to understand the Indian customer requirement much better, thus enabling KMID to offer better solutions and services to the Indian customer using Kyocera Mita products. "KMID has been established to support our Business Channel Partners in one of the fastest growing markets of the world," said Mr. Y.Tagawa, Board of Director and Senior Managing Executive Officer, Kyocera Mita Corporation.

The Indian subsidiary shares the primary philosophy of Kyocera group, "Preserve the spirit to work fairly and honourably, respecting people, our work, our company and our global community. We are committed to establish a great customer oriented organization, where customer is given the highest priority above every things else." said Mr. K. Swetharanyan, Managing Director, Kyocera Mita India.

ECOSYS Concept: As a manufacturer that delivers information devices, Kyocera Mita Corporation's focus is to continue to make products with concern for the environment. "We think it is to keep replacement parts to a minimum and lessened the impact on the environment in terms of resources. This is how our ECOSYS concept was born. The name was our way of conveying that the

product offered a higher level combination of ecology, economy, and system," says Mr. Y. Tagawa.

Kyocera Mita goes behind: Due to their long lasting design, ECOSYS products reduce running cost, thus making them economical value for customers. The ECOSYS long-lasting technology, a Kyocera Mita exclusive, has achieved several important goals: It reduced waste products, provided economic value by minimizing the total cost of ownership, and lessened the impact on the environment.

Responsibility to society: Kyocera Mita wants to evolve with concern not just for the useful and forward-looking document environment that the company enjoys, but also with concern for the environment of the earth. "If we were to divert our attention from environment, we would not be able to fulfill our social responsibilities," concluded Mr K. Swetharanyan.
