

APU – A UNIQUE, SUCCESSFUL EXPERIMENT

Ritsumeikan Asia Pacific University (APU) was founded by Ritsumeikan Trust, one of Japan's oldest and most distinguished private non-profit making educational institutions, in 2000, as a unique experiment in international higher education. Currently it has about 6,000 students, as well as faculty/staff from over 80 different countries and regions worldwide, with a native Japanese and non-Japanese population ratio of close to 50:50. Our undergraduate programs are taught through bilingual English-Japanese medium, while all the graduate programs are conducted entirely in English. APU has witnessed the visits of world personalities including Nobel Laureates Prof. Amartya Sen and Prof. Lee Yuan Tseh, and has hosted major events in collaboration with the UN, ASEAN, the Japanese MOFA etc. Japanese Government in the form of "Good Practice" award has acknowledged APU's innovative approach to education.

APU is currently collaborating with two government ministries and several leading Japanese companies to implement the "Career Development Program for Foreign Students from Asia". Meanwhile, APU has been selected by the Education Ministry (MEXT) to implement the "Global Business Leaders Program" and the "Priority Graduate Program". Both programs aim to develop young dynamic human resources to cater to the needs of the industries in and outside Japan through scholarships for the selected students. Many students so far have been honoured with prestigious scholarships from the World Bank, the Indonesian Government (PHRDP-III) and the Japanese Government.

Ever-steady-improving Indo Japan cooperation got a boost with the recent frequent meetings between head-of-states of the two nations. Huge initiatives, such as Metro rail, Delhi-Mumbai & Delhi-Kolkata freight corridor and Delhi Mumbai Industrial corridor have opened wide vistas for the experts of Japanese

language, culture, business practices and management studies. Almost 70 APU graduates from India are gainfully employed either in Japan or in Japanese companies outside Japan, including India are contributing with complete sense of satisfaction and are leading lights for the continuing and future students. We advise young students to first shortlist their future priorities in terms of career, study the programs offered at APU and make their choice. We welcome all those who have a desire to play an active role in fostering international cooperation and sustainable economic development in this region.
